CAREER OBJECTIVE

Dedicated and motivated developer seeking a full-time **Junior Frontend Developer, React Developer, or Junior Full-Stack Developer** position in Adelaide, South Australia. Eager to relocate from Nigeria to contribute hands-on web development skills, problem-solving abilities, and project experience to an Australian technology team, while requiring appropriate visa arrangements or employer sponsorship.

PROFESSIONAL SUMMARY

Aspiring full-stack software developer with practical experience building responsive web applications and React interfaces, including delivered web solutions for real client operations. Possesses strong foundational skills in HTML5, CSS3, modern JavaScript (ES6+), React.js, UI/UX principles, and Git/GitHub workflows. Enthusiastic about practical technology problem-solving, continuous code refinement, and contributing effectively to a collaborative professional development environment.

TECHNICAL SKILLS

FRONTEND DEVELOPMENT	HTML (Good) • CSS (Good) • JavaScript (Good) • React.js (Good)
DEVELOPMENT TOOLS	Git (Good) • GitHub (Good) • Vite (Practical Project Exp.) • GitHub Pages (Practical Deployment Exp.)
BACKEND & LANGUAGES	Node.js (Beginner) • Express.js (Beginner) • Python (Beginner) • C Programming (Good)
DESIGN & PRACTICES	UI/UX Design • Responsive Web Design • Component Architecture • MS Office • Problem Solving

KEY PROJECT EXPERIENCE

GATDABLESS GROUP — CLIENT WEBSITE

HTML5 • CSS3 • JavaScript

Live Site: https://chimapro123.github.io/GATDABLESS-GROUP/

Designed and developed a corporate website for an active commercial client operating across real estate, construction, travel/tours, and creative media production.

- Built a structured, multi-sector web interface to present business services and corporate brand identity clearly.
- Implemented client-focused frontend design using clean HTML5 markup and custom CSS layout styling.
- Ensured cross-device responsive layout consistency to support clear communication with prospective customers.

DTECH — PERSONAL DEVELOPER PORTFOLIO

React.js • Vite • CSS3 • Supabase • GitHub Pages

Live Site: https://chimapro123.github.io/portfolio-React/ | GitHub: https://github.com/Chimapro123

Designed, engineered, and deployed a modern developer portfolio platform showcasing technical projects, skills, and interactive features.

- Architected modular React components with Vite build automation for fast page loads and smooth client interaction.
- Integrated theme switching controls, dynamic project presentation modules, and an interactive review feature.
- Deployed and maintained the live production application via GitHub Pages CI/CD pipeline.

KEY PROJECT EXPERIENCE (CONTINUED)

BAILORD — E-COMMERCE INTERFACE

React.js • Vite • JavaScript • CSS3

Front-end development project focused on creating a modern digital shopping catalog for mobile phones and tech gadgets.

- Engineered structured product categories and interactive navigation layouts for online retail browsing.
- Focused on component reusability, state management, and clear UI layout hierarchy for user experience.

ARTMIND AI PORTAL — DIGITAL ART GALLERY

React.js • TypeScript • Vite (Project In Development)

An AI-focused digital art gallery application concept designed around artwork discovery and interactive digital exhibits.

- Developing component structures using React and TypeScript for strong type safety and scalability.
- Structuring interfaces for upcoming artificial intelligence integration and creative visual media rendering.

EDUCATION & TRAINING

Full-Stack Development Programme

April 2026 – December 2026 (In Progress)

Aptech Computer Education — Lagos, Nigeria

- Comprehensive software engineering curriculum spanning web design, information systems management, and AI principles.
- **Key Study Modules:** CPISM and Web Design, Python Programming, Frontend Web Engineering, Python Backend Development, Information Management Systems, Generative AI Applications, and Product Management.

Secondary Education Certificate

Completed 2016

Dan and Dav College

PROFESSIONAL STRENGTHS

- **Practical Problem-Solving:** Methodical approach to troubleshooting bugs and refining UI layout behavior.
- **Project-Based Learning:** Demonstrated ability to quickly master and apply new frameworks through hands-on project builds.
- **Responsive Web Development:** Strong focus on building accessible, mobile-first interfaces across screen viewports.
- **User-Centered Interface Design:** Commitment to clean layout structures, modern styling, and simple user journeys.
- **Continuous Improvement:** Active dedication to technical growth, accepting constructive code feedback, and adopting industry best practices.
